[Close](#)MODEL FLOODPLAIN MANAGEMENT ORDINANCE  
60.3(b)

The following model ordinance pertains only to the special flood hazard areas in a community that participates in the Regular Program Phase of the National Flood Insurance Program (rather than the Emergency Program Phase). It has been designed to meet minimum Federal requirements as published in Title 44 of the Code of Federal Regulations.

Not all sections in this model ordinance may be applicable to a community that wishes to adopt a floodplain management ordinance. **Before adoption, this model ordinance should be thoroughly studied by community officials, planning commissions, and the community's attorney, as to its adequacy and suitability to the community's needs.** This will ensure that the community's specific floodplain management issues are governed in a reasonable manner without inflicting unnecessary hardships on people living in flood-prone areas.

This model does not prohibit development in the special flood hazard areas. It does set forth minimum performance standards for new construction or substantially improved structures. Communities may apply stricter regulations than the minimum Federal requirements. For assistance in tailoring this ordinance to meet your community's specific needs, a Community Mitigation Programs Specialist may be contacted at the following address:

Federal Emergency Management Agency  
Mitigation Division  
9221 Ward Parkway, Suite 300  
Kansas City, Missouri 641114-3372  
Phone: (816) 283-7002
